- Ms. Johanna Pattenier, Member of the Supervisory Board of Valneva SE (Agreement signed on June 29, 2021).

Agreements authorized by the Supervisory Board on May 5, 2021

Purpose of the agreements - Interest for the Company

Under the terms of the agreements, the Company undertakes - to the fullest extent permitted by applicable laws and regulations, and subject to additional limitations as detailed in these agreements - to indemnify each of the corporate officers, in the event that their personal legal liability is called into question in the performance of their duties, by covering certain procedural expenses (where applicable, via advance payments) as well as damages to be paid that would not be covered by the **D&O Insurance** (including, in particular, deductibles or any amount exceeding the cover limits).

These agreements were entered into in the interest of the Company because of the following:

- Following the Company's IPO on the Nasdaq, corporate officers are exposed to significantly increased risks of personal legal liability (in comparison with the level of risk arising from the application of French law). As a result of these additional risks, directors and officers of other companies listed in the United States are typically indemnified and/or insured.
- The Company considers that being listed on the Nasdaq is a key factor in the success of its future development, as this market generally has the highest valuations of biotechnology companies, as well as the highest stock liquidity, thus giving better prospects to the Company's shareholders.
- In this context, the engagement of current and future corporate officers is necessary for the achievement of the Company's objectives, and the absence of any protection that the Company could offer in the form of insurance and indemnification might prohibit such corporate officers from continuing in or accepting their duties within the Company.

In seeking insurance coverage for its corporate officers, the Company learned that such insurance is currently extremely expensive and difficult to secure. The D&O Insurance that the Company finally obtained includes a very high deductible and is limited in scope and degree of protection provided despite its cost. The Company therefore concluded that being able to provide the indemnities and advances of expenses provided for by the agreements was important, since this offers corporate officers more complete protection than that resulting from the D&O Insurance alone, and that the required protection could not be achieved by any means other than by entering into these agreements.

The Company believes that the provisions of these agreements are in the best interest of the Company and its shareholders, and that these provisions will benefit the Company through promoting the continued retention and recruitment of corporate officers.

Amendment 1 to the 2019-2022 Management Agreement executed between Mr. Franck Grimaud and Valneva SE on March 4, 2021

Mr. Franck Grimaud is a member of the Management Board and Directeur Général & CBO of the Company.

Amendment authorized by the Supervisory Board on January 15, 2021

Purpose of the agreement - Interest for the Company

This amendment provides in particular for additional compensation for the corporate officer in the event of a change of control of the Company before the final grant of long-term incentive financial instruments, as well as changes to the rules governing remuneration in the event of termination of the Management Agreement or non-renewal of the corporate officer's term of office at expiry (severance package indemnities set at one year's fixed compensation, including the notice period).

The amendment was entered into in the best interest of the Company since (a) it minimizes the Company's financial exposure if a member of the Management Board is dismissed in the course of his term of office, and (b) it ensures that any indemnity linked to a change in control of the Company is no longer conditioned on the dismissal of the corporate officer, thus potentially allowing a smooth transition in the event of a change of control.
